

29 January 1963

#136-031

Dear Jack,

As a result of your request in OSA-1838-62, a Handbook of Information for Flight Planning, Photo Interpretation, and Film Evaluation for the Model Type IIA has been prepared. Thirty copies, numbered 20-49 inclusive, are being shipped to you via the next Project aircraft. Since weather makes shipment a little unpredictable these days, copies 10 and 11 are inclosed for your immediate use.

The Handbook is preliminary and can certainly be improved as more experience is gained. I trust it will serve your purposes for the present, and we would welcome any comments from you for future revisions.

Wayne
